

## Successful Requests

<b>200</b>	OK	Request was successful
<b>201</b>	Created	Request successful, new entity created based on that request
<b>202</b>	Accepted	Request received successfully but may not be processed immediately
<b>203</b>	Non-Authoritative Information	Request successful, but information sent to client about response comes from third party server
<b>204</b>	No Content	Request successful but no data sent back
<b>205</b>	Reset Content	Request from server to reset information sent e.g. form data
<b>206</b>	Partial Content	Response to successful request for only part of a document

## Redirects

<b>300</b>	Multiple Choices	Requested document has moved or matches multiple options
<b>301</b>	Moved Permanently	Requested document moved permanently, response contains URI for new location
<b>302</b>	Found	Requested document moved temporarily to new location, response contains URI
<b>303</b>	See Other	Requested document found, corresponds with URI where document can currently be found
<b>304</b>	Not Modified	Requested document not changed since last request, client can load cached version of document
<b>305</b>	Use Proxy	Requested document can only be accessed through specified proxy
<b>307</b>	Temporary Redirect	Requested document moved temporarily to new location, response contains URI

## Server Errors

<b>500</b>	Internal Server Error	Generic error message
<b>501</b>	Not Implemented	Server does not implement what is required to fulfil request
<b>502</b>	Bad Gateway	Server acting as gateway or proxy received response from upstream server that was deemed invalid
<b>503</b>	Service Unavailable	Server currently unavailable due to high load, maintenance, or other temporary situation
<b>504</b>	Gateway Timeout	Server acting as gateway or proxy did not receive response within an acceptable period of time
<b>505</b>	Version Not Supported	Server does not support HTTP protocol used by client

## Client Errors

<b>400</b>	Bad Request	Server did not understand request due to bad syntax
<b>401</b>	Unauthorised	Client must be authorised before accessing requested document
<b>403</b>	Forbidden	Client does not have permission to access requested document
<b>404</b>	Not Found	Requested document not found at specified URI and no new location specified
<b>405</b>	Method Not Allowed	Request method was not allowed for specified document
<b>406</b>	Not Acceptable	Requested document cannot be sent in way client can understand
<b>407</b>	Proxy Authentication Required	Client must be authorised by proxy before document can be sent
<b>408</b>	Request Timeout	Request time exceeded server time limit
<b>409</b>	Conflict	Requested document could not be sent due to conflict in request
<b>410</b>	Gone	Requested document has been permanently removed from specified URI
<b>411</b>	Length Required	Request refused because content length must be specified by client
<b>412</b>	Precondition Failed	One or more request conditions has failed
<b>413</b>	Entity Too Large	Server unable to handle request due to size
<b>414</b>	URI Too Long	Server could not handle URI due to length
<b>415</b>	Unsupported Media	Format of one or more parts of request is unsupported
<b>416</b>	Range Not Satisfiable	Part of document requested does not exist
<b>417</b>	Expectation Failed	Server could not fulfil requirements sent in "Expect" header field
<b>422</b>	Unprocessable Entity	Request could not be allowed due to semantic errors
